K-9 Bed Bug Service

A brief word about our service. We are an independent Bed Bug company that works for you and not any extermination service. With the aid of a fully trained bed bug detection dog we are 95% accurate in detecting bugs and this can be a true saving to you by reducing the amount of cleaning and evacuating when you know where the source, or sources are coming from. A human looking for a bedbug is at most 30% accurate and doesn't go behind wall plugs or baseboards.

We are available to demonstrate the skills of Ken Linville who is "Mikki's" handler who will show how she can find bugs. We are open to a discussion about any bed bug problems you have.
